GEOLOCATE an AED!
iRescu.info/AEDupload.htm

iRescu

So you would like to upload an AED(s) location you have found?
Well, here is what you need to do -
Its as easy as 1, 2 and 3!!

- 1. FIND** an AED
- 2. TAKE** a PICTURE of the AED in its location
- 3. SUBMIT** picture and info about AEDs location-
HERE!(via this form on your pc or email info to AEDupload@iRescu.info, you can also scan this eTag with your smartphone to submit) - use free Microsoft Tag App to read the eTag

The iRescu project is building an AED database freely accessible to the public so that when a Sudden Cardiac Arrest occurs, that vitally important Automatic External Defibrillator (AED) is right on hand and locatable.

This AED location information will be available to everyone including Emergency Services and bystanders so they can find AEDs quickly using smartphone Apps, like iRescu for free. Should you be interested to participate and add AEDs you have found to the AED database - you can enter those AEDs here. All
